

Market Release Note

MRN-TS1016LE-001

Product number: TS1016LE

Product description: ChallengerLE Control Panel

Product version: V10-06.8435

Affected parts: N/A

Release date: 15 October 2015

Interlogix is pleased to announce the immediate availability of ChallengerLE.

ChallengerLE complements the Challenger family of control panels by providing a security solution designed for the budget conscious or those who have an issue with space. The small footprint panel takes up just a fraction of the space previously required.

Key Features

- On-board Ethernet, USB and RS-232 with optional 3G expansion module for ultimate connectivity
- Fully flexible communications with options for simultaneous and redundant reporting to monitoring stations, management software and third-party systems
- Small form factor
- iOS and Android mobile app for simple and convenient operation
- High level integration to building automation (C-Bus)
- Full text descriptions of panel items (e.g. users, inputs, areas, doors, etc.) are stored in the panel
- Fully backwards compatible with most Challenger V8 peripherals
- Upgrade via remote flash firmware
- Support for multiple end-of-line (EOL) resistor values for economical upgrade from other alarm systems

Documentation

Marketing Collateral	ChallengerLE Datasheet
	Tecom Hardware Compatibility Matrix
	Tecom Software Compatibility Matrix
Technical Manuals	Challenger Series Programming Manual *
	Challenger Series Installation and Quick Programming Manual
	Challenger Series Administrators Manual
	Challenger Series Users Manual

* Secure log-in required to Interlogix Support Portal

Known issues

- Intelligent controllers (eg TS0867 Four Door Controller, TS0869 Four Lift Controller) are not supported.
- The ChallengerLE panel cannot communicate in polled mode via TCP/IP to management software.
