

Market Release Note

MRN-TS9002-351

Product number: TS9002

Product description: Titan 3.5.1

Product version: TS9002-R03.05.01

Affected parts: TS9002

Release date: 21 March 2018

Interlogix is pleased to announce the immediate availability of Titan 3.5.1

New features

- Ability to set Nightlight option on TS0870 smart card reader using Remote Arming Station control dialogue (see [Market Release Notice TS0870-Offline](#) for more information)
- Systems and panels can now be exported in a TitanCT format, which allows an easy upgrade path from Titan to TitanCT
- Support for Event clearing on Disarm in the comms path filter (introduced in Challenger10 firmware V10-06.17295).

Improvements

- Alarm groups and alternate alarm groups that contain user categories with alternate settings are now migrated correctly from a V8 to V10.

All downloads can be found at www.interlogix.com.au/downloads

* Technical manuals can be downloaded via the [Interlogix Support portal](#). Please note some documents are protected via login credentials.

Issues resolved in this release

- General fixes and improvements

Known issues

- When multiple panels are connected using multi-drop on a single serial port, there may be times that only the first Challenger panel communicates. If this should occur, go to Control > Challenger Version No, then recall the version for all panels. This will prompt the panels to communicate correctly.
- It is not possible to convert a Challenger10 with V8 input numbering to use standard Challenger10 input numbering, and vice-versa.
