

Market Release Note

MRN-TS97101-21B8

Product number: TS97101

Product description: Security Commander

Product version: 2.1 build 8

Affected parts: TS97101S – Standard Edition (no longer includes DVR licenses)
TS97101P – Professional Edition (no longer includes DVR licenses)

Discontinued parts: TS97101MEDIA – Software now available via download
TS97608 – Eight DVR license (replaced with camera licensing)

New parts: TS97616 – 16 camera license
TS97632 – 32 camera license

Release date: 21 October 2014

Interlogix is pleased to announce the immediate availability of Security Commander 2.1.

New Features

- Updated video integration:
 - Support for latest TruVision devices (see TruVision plug-in datasheet for details)
 - Support full third party video integration via plugin
 - Drag and drop cameras into grid layouts
 - Save and recall custom grid layouts
 - Load multiple grid layouts
 - Full screen mode for grid layouts
 - Select low bandwidth video streams (if supported by plugin)
 - Export video clips and save video snapshots
 - Automated camera import
 - Pre-alarm timer (replay tagged footage a set time before actual tag to capture full incident)
- Windows 8.1 / Windows Server 2012 support
- MS SQL Server 2012 support
- Manual CSV user import
- Updated Titan import to include user photos and departments
- Updated card learn feature (put raw card data straight into field)
- Improved Person in Region report to only show within a particular time window and to filter by department

Resolved issues

- Titan user import now handles situations where users have the same PIN used across multiple panels. The full user information is now imported, except for the PIN. This is because two badges cannot have the same PIN code in Security Commander. In these cases, operators will need to manually reassign the user's PIN.
- Message sequence numbering has now been added to the Challenger panel communications. This increases the speed and reliability of the Challenger communications.

Documentation

Marketing Collateral	Security Commander Datasheet
	Tecom Software Comparison Matrix
	Security Commander A&E Specification
	Security Commander Sales Presentation
	TruVision Video Plugin Datasheet
	Genetec Video Plugin Datasheet
Technical Manuals	Security Commander Administrators Manual and Operator Guide
	Security Commander Installation Manual
	Security Commander API Installation and Operation Manual
	Security Commander CCTV Interface Guide
	Security Commander SQL Server Mirroring Guide
	Security Commander Photo ID User Guide

Known issues

- Photo ID module occasionally does not allow static images to be used in card layouts. Suggested workaround is to create the template on a PC not exhibiting the problem and then import the template into the system to be used.
